

AVENTO

high/low

Avento high/low

The Avento high/low relax chair is a real blessing for the patient. The chair is equipped with a high/low system and a relax mechanism that inclines the backrest, seat and legrest simultaneously into a “zero gravity” position. The patient enjoys an exceptional support in the Avento high/low chair.

Have a try,
you'll love it!

01. HEIGHT ADJUSTMENT

Comfort for everyone

Height adjustment between 53 and 83 cm thanks to a hydraulic pump easy to operate by means of a pedal at both sides of the chair.

02. RELAX MECHANISM

A blessing for the patient

Less pressure points on the body and a good blood circulation thanks to the patented mechanism “Zero Gravity”.

03. CENTRAL BRAKE

Mobile and flexible

The chair is extremely manoeuvrable and mobile, thanks to the large castors and the central brake system on 4 castors.

04. DESIGN

Hidden functionality

The mechanism is completely hidden by a design cover cap in synthetic material. The rounded corners of the cover cap make it more easy to clean the chair.

05. MODULARITY

According to your needs

The relax chair can be composed the way you want it. Various accessories make the chair more complete, such as a removable headrest, a dinner tray,...

(*) *Zero gravity position*: this seat/lying position is based on NASA data. A neutral body position converts all muscle power into a biomedical balance. (Source: “From outer space to you”, Omni, March 1994)

AVENTO E-MOVE

Electric version

Easy to operate with an **intuitive handset**. Two actuators make sure that the backrest, seat and legrest tilt or lift the patient to the desired position. Advantages: more autonomy for the patient / 1 central handset, to activate all care functions. Li-ion battery (option).
